Technical Skills

Algorithms, DBMS, React, Redux, Redux-saga, React-native, JavaScript, C++, Python, golang, PHP, Flask, git, Jest , firebase, realm

Education

- 2016–2020 **UIT,RGPV Bhopal**, *B.E, Information Technology.*
7.55/10

Projects

- 2020 **obfuscator-io-metro-plugin**.
This is an open-source library to obfuscate React Native bundle in APK to prevent code theft, it has 48k+ downloads and 1k+ active weekly downloads.
- 2020 **Vyomology.com**.
I created entire frontend from scratch of this astrology site using React as a freelance work. It includes authentication, chat system for communication between astrologer and user, payment, themeing etc.
- 2019 **Portfolio website**.
This is a generic portfolio website, it is hosted on github pages. It is built using react.
- 2018 **Web IDE**.
Developed a web-based IDE that can support all programming languages. I made some modifications in it and hosted a coding competition at my college.
